ICSA ALL ACADEMIC COMMITTEE REPORT AGM 2020

- The current criteria for the award need to be modified if a team is to be named this year.
- The committee has not been meeting regularly as the current criteria only required verification of GPA and minimum participation requirements.
- Executive committee should decide if they want to name a team and if so, what the new criteria should be.

Regardless of any criteria change for this year, the committee should be reformed with new leadership (I have previously asked to rotate off this committee.) The award criteria should be reviewed. The following issues should be examined:

1) GPA of 3.3-The size of the team-size of team is generally around 250 students. Does having such a low GPA criteria due a disservice to the many elite student athletes who are lumped in with the lower GPA students? Committee needs to verify GPA with transcript for all nominees (usually just over 250 nominees).
2) Participation criteria- This requires output from techscore. No actual report function exists and required Dayan to pull data from sailor ID numbers to produce a report. A new All Academic reporting system should be implemented to easily verify whatever criteria is set.
3) Review policy for special cases including schools with no grades or grade optional policies. Offshore teams that do not meet criteria in college events.

Respectfully submitted,
Matt Lindblad
