

ICSA All-Academic Committee Report
2024 Winter Meeting
December 13th, 2023

The All-Academic Committee awarded 288 All-Academic Honors for the 2022-2023 year. Congratulations to all award winners.

This year the committee worked through over 330 nominations to get to the 288 recipients. This represented a 50% increase in both nominations and recipients.

The roughly 40 nominations which didn't receive honors represents about 75% duplicate nominations and 25% nominations failing to meet the requirements. Most common reasons for failing to meet requirements were not having the required number of regattas, not meeting the **cumulative** 3.3 GPA requirement, or individuals rounding up their GPA.

New this year the committee attempted to confirm each individual nomination. This was a manual process which worked well while nominations came in slowly but had issues when nominations came in quickly close to the deadline. The submission portal, machform, doesn't offer a simple way to automate the submission confirmation.

The timeline to announce the 2022-2023 team was challenged by two things. First, the timing of final transcripts by schools on the quarter system, and second by the work needed to confirm the information on 330 nominations.
