

2024 Rules Committee Proposal
Practice at Championship Venue

At the direction of the ICSA President, the Rules Committee has created two new versions of PR27, Practice Prior to an ICSA National Championship. The current rule was not written with the current nationals qualification process in mind. As it stands, Rule 27 turns on at different times for different teams, earning an AQ berth vs. being selected. This needs to be fixed so that all teams have it turned on at the same time.

Both options below only change PR27 itself. Parts a), b), c), and d) underneath PR27 will all remain the same.

Option 1

Once a college has qualified for an ICSA National Championship, members of their conference shall not sail either at the site or in the boats to be used in the Championship until the first day of competition for that Championship.

Option 2

Once the selected teams for an ICSA National Championship are announced, no college that has qualified for that Championship shall sail either at the site or in the boats to be used in the Championship until the first day of competition for that Championship.
